Ideal product for cleaning and degreasing the sidewalls of lift stations. Powerful solvent cuts through build-up without adversely affecting the biological process.

Use **HARVEST GOLD 2005** in conjunction with United 884 BioCharge/BioFarm® system to keep your collection system running free of accumulated grease and odors.

**LIFT STATIONS** — Mix 1 part of **United 2005** with 5 to 30 parts of water and spray on sidewalls. **United 2005's** superior emulsification system solubilizes and cuts oil, grease, scum and slime buildup on the walls, so it can be easily flushed away. For a product which layers the top of the lift station and stays there working, there's United 2004 HARVEST GOLD Lift Station Maintainer.

When using a metering pump with this product, you must use Viton® tubing.
