

UNITED

LABORATORIES

United 888 GASTMASTER is a 1/2-pound charge that inhibits the production of H₂S gas in collection systems when used in conjunction with United's BIOFARM® system. **GASTMASTER** provides a truly low-maintenance approach to odor and H₂S reduction in lift stations and sumps.

The innovative Inter-Core Technology combines the staying power of proven block technology with the instant concentrated dosage of a granular active.

- The core of the **GASTMASTER** charge consists of 10 billion CFU/g count of a special bacterial blend that is released as a slug dose into the waste stream within minutes.
- The exterior of the **GASTMASTER** charge is a special blend of bacteria. The 10 billion CFU/g block is designed to release its bacteria over an extended time of up to 6 weeks to continually biodegrade grease and other organic wastes.

FEATURES AND BENEFITS:

- Specifically blended and adapted to reduce H₂S gas accumulation by as much as 30%.
- Earth Smart® Certified.
- Easy-to-use charge designed for use with United's BIOFARM® system.
- Contains facultative anaerobes which work with or without oxygen.
- Charge withstands a wide range of temperatures and adverse conditions.

DIRECTIONS FOR USE:

For best results, we recommend using **United 888 GASTMASTER** in conjunction with United's BIOFARM® system. To determine the number of **GASTMASTER** charges, please refer to the following chart. Please remember that every system is different and must be treated according to its specific organic mix and operational parameters so some variances may be necessary.

Flow	Recommended number of United 888 GASTMASTER H₂S Inhibitor Charges
Under 20,000 GPD	1
20,000 – 40,000 GPD	1
40,000 – 80,000 GPD	2
80,000 – 150,000 GPD	3
150,000 – 200,000 GPD	4

DIRECTIONS FOR USE: (continued)

While many variables may affect the life of the **GASTMASTER** charges, they typically last between two and six weeks depending on water flow through the BIOFARM®.

Lift Stations: BIOFARM® with **GASTMASTER** charges should be used in low flow applications. Suspend the BIOFARM® so the entire unit is submerged below the water at its lowest level. Refer to the chart above for proper dosages.

Sumps: BIOFARM® with **GASTMASTER** charges should be suspended in the sump so the unit is just under the water's surface. Refer to the chart above for proper dosages.

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Flush eyes with cool water for at least 15 minutes while keeping eyelids open. If irritation persists, seek medical attention.

SKIN: Wash with soap and water. Launder clothing. If irritation or redness persists, seek medical attention.

INHALATION: Not applicable.

IF SWALLOWED: Thoroughly rinse mouth with water. Drink one or two glasses of water. Slight gastrointestinal discomfort may occur.

An MSDS for this product is available through United's website, www.unitedlabsinc.com, providing 24 hour access. Please read the MSDS carefully and follow all directions when using or handling this product.
