

New Improved Formulation Enriched With Proprietary Micro-Nutrient Package.

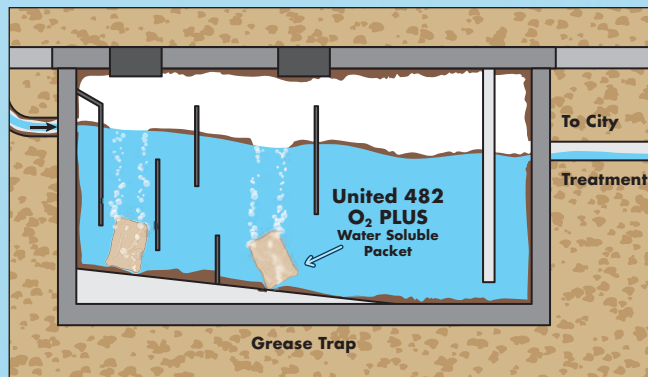

Breathe New Life into Your Waste Streams with O₂ PLUS

What better way to stimulate biological activity and biodegradation than to:

- Add additional low-level oxygen into your waste stream.
- Add a new micro-nutrient package to provide an additional food source for beneficial bacteria.

Now, it's easier than ever before with two great products from United:

United 482 O₂ PLUS Water Soluble Packets

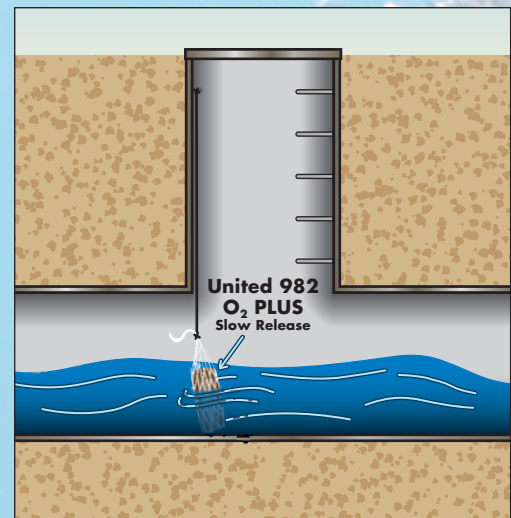

Perfect for use in:

- Mains
- Lift Stations
- Grease Traps
- Sumps
- Stagnant Water

O₂ PLUS:

- Generates Low-level Oxygen
- Stimulates Beneficial Biological Activity
- Increases Biodegradation of Organic Waste
- Reduce Odors
- Near Neutral pH

United 982 O₂ PLUS Slow Release with Inter-Core Technology

- Works at Temperature Range of 48°F to 120°F
- Starts Working in Minutes
- Continues Working for 60-90 Days
- Earth Smart® Certified

United 982 O₂ PLUS Slow Release with Inter-Core Technology:

The patent-pending Inter-Core Technology provides you with the instant concentrated dosage of a granular active, followed by proven block technology that provides continuous, extended performance.

United 482 O₂ PLUS Water Soluble Packets:

Each 8-ounce water soluble packet contains time-released actives to quickly spur on biological activity, while also providing extended slow release activity over 60 – 90 days.

Using O₂ PLUS is like offering CPR to your system to get it breathing once again, significantly improving beneficial biological activity.
